

KING'S SUTTON PARISH COUNCIL - ANNUAL PARISH MEETING 2019

Annual report – Councillor for Lighting

The parish council (PC) acts as the Local Lighting Authority for the street lights providing “footway lighting” in the village - as opposed to “highway lighting” for which the county council is responsible (and none of which is currently provided in King’s Sutton).

The council’s budget allows for the routine maintenance and repair by our lighting contractors of the more than 120 lights currently provided in the village and for the payment of the electricity supply to them.

In addition, budgetary provision is also made for the installation of new lights as and when necessary.

The PC has been notified that the Highways Authority (NCC) has now adopted Halestrap Way and accordingly on receipt of the adoption certificate, the PC has now assumed responsibility for the additional lighting installed on the street.

The PC has recently been informed that the cost for the supply of electricity for the lights is to increase by 23%.

Bob Burrell – Councillor for Lighting
