

KING'S SUTTON PARISH COUNCIL.

THE RECREATION REPORT 2016.

The recreation ground has been well looked after over the past year and has been well used by residents of the village, and visiting parents with children from else where.

We say a big thank you to our grass cutting contractor, and also to our safety inspector who makes sure that the play equipment is in good order. We think you would agree that the recreation ground is a picture at any time of the year and is being well maintained.

Use of the recreation ground has been unprecedented, in that large numbers of adults and children are using the equipment and facilities, for picnics and games, and even using the lovely designed litter bins.

The recreation ground is used every day, except in inclement weather.

Our local children reckon *"it's the best thing since sliced bread"*, which is iterated by visiting children and parents.

The use of the recreation ground and the new equipment has a learning curve.

For example: Picking up litter

 Parking in the designated areas

 Taking extra care when alighting from vehicles

So we are hoping that this year, residents and visitors of King's Sutton (especially Parents) will have learnt their lessons last year.

The recreation ground has been used for various activities, including the fair, the scarecrow day, fund raising days, plus many others.

It is an asset to the village, is well used by the children, which at the end of the day, was what the recreation ground was given to King's Sutton for, many, many years ago.

It is for the **Children to Enjoy!**

Walter Mullis and Carole Hill.
